

The NI is a Professional Institution and Learned Society. This enables us to offer a range of membership grades to meet your requirements.

Fellow (FNucl) and Member (MNUcl) - For those seeking recognition for their professional status within the nuclear industry the following grades carry with them post nominals and the opportunity to become registered with the Engineering Council.

Successful candidates in most cases will be eligible for registration as Chartered Engineer (CEng) and also as European Engineer (EurIng) if desired.

We also are able to offer Associate Member (AMNUcl) and Engineering Technician (TNUcl) status. Successful candidates in most cases will be eligible for registration as Engineering Technicians (Eng Tech).

The NI also offers membership for those who have an interest in the sector or are starting on their careers within the nuclear industry.

- Learned Member
- Graduate Membership
- Student Membership
- Retired Learned Member

Through our education and training activities and by providing opportunities for networking the NI is able to assist its members in progressing through the membership grades as their careers develop.

The NI welcomes support from companies within the industry via the company membership scheme as Company Partners or Company Members, with a range of supporting benefits to your employees.

Membership application information and forms can be accessed via the Nuclear Institute website [www.nuclearinst.com](http://www.nuclearinst.com) or by contacting a member of the NE Branch committee.

Welcome to our programme of events for the Nuclear Institute North East Branch in 2010-11. As the Chairman of the North East Branch, I am pleased to welcome you to this season's calendar of events and activities.

The North-East Branch, which stretches from Northumberland through to Yorkshire, may be one of the smallest branches but we seek to maintain an active and innovative programme of events to service our members and the public, we hope that the year ahead is no exception.

The Nuclear Institute has five clear objectives:

1. The advancement of education relating to nuclear energy and its application and ancillary subjects
2. The advancement of nuclear science, engineering and technology
3. In the interests of public safety, the promotion of high standards of education and professional performance amongst those engineers, scientists and others working within the nuclear industry
4. The promotion of public understanding of nuclear sciences and the impact on society and the environment
5. To undertake such other charitable purposes as the Trustees in their discretion may from time to time decide

Finally I would like to extend my thanks to the hard work of your dedicated branch committee, volunteers, YGN, and the support of many nuclear companies and organisations in this region to our activities.

I look forward to welcoming you to our future events, where members of the committee will also be available to help you with NI membership and CPD queries.

*Mark Lyons*  
NI NE Branch Chairman
