NI YGN presents Introduction to Nuclear Power Generation

Seminar Details

This is a three day technical conference that provides an excellent opportunity to learn more about the nuclear industry, as well as the chance for young professionals to network.

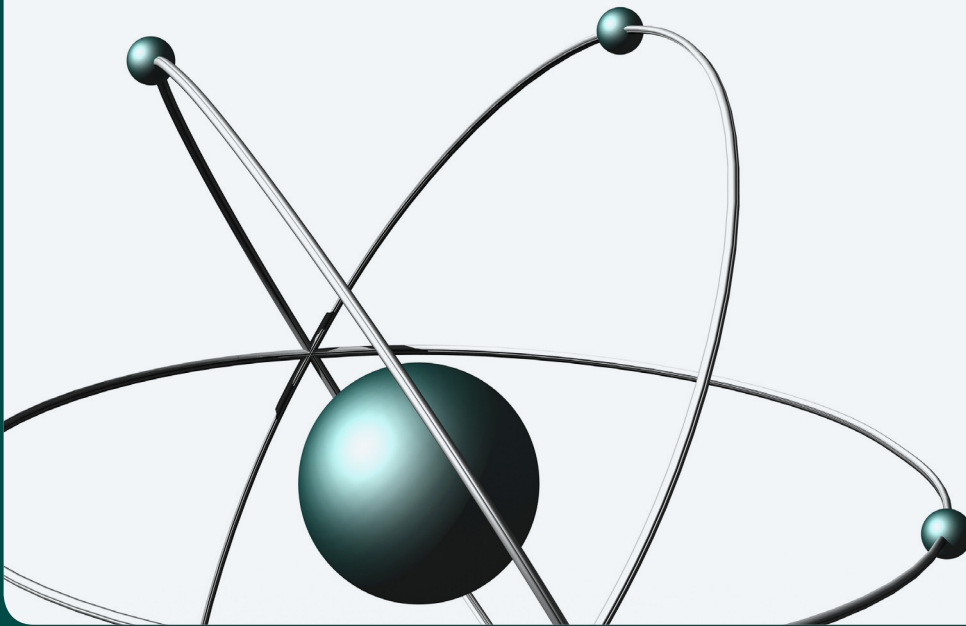

There will be a wealth of talks from various industry leaders such as Stuart Crooks Managing Director of EDF Energy, Riccardo Chiarelli operating team-leader at WANO and Dr. Brian Connolly PhD senior lecturer at University of Birmingham - covering a range of topics from the history of the UK nuclear industry, through nuclear professionalism and operational challenges in running a nuclear plant to the future of the nuclear power. The three days will also contain tours of both the Joint European Torus (JET- fusion reactor) and one of EDF Energy's Advanced Gas-Cooled Reactors (AGR) - Hinkley Point B.

The conference includes a wide range of technical presentations related to the industry, as well as tours to the JET fusion reactor and Hinkley Point B power station. JET, Joint European Torus, is currently the world's largest Tokamak. The JET facilities include plasma heating systems capable of delivering up to 30 megawatts of power, an active gas handling system and a beryllium handling facility, providing JET with a unique tritium and beryllium capability, respectively.

EDF Energy owns and operates Hinkley Point B, a twin advanced gas-cooled reactor (AGR) Power Station designed to generate 1250MWe, situated on the Somerset coast. This is also the site where EDF Energy plans to build the first new nuclear power station in Britain for over 25 years, which will be an EPR.
