

YGN Presents: An Introduction to Nuclear Power Generation

The Young Generation Network presents a three day technical conference that includes presentations from distinguished professionals within the nuclear industry followed by two one-day tours of both the JET fusion reactor and Hinkley Point B nuclear power station.

The future of power production in the UK is an unknown and challenging affair. With targets of reduced CO₂ emissions needing to be met, how does the closure of fossil fuel stations affect the nuclear industry and the energy market as a whole? Where does the new Hinkley Point C project fit into this model?

How is fusion, a phenomenon only seen under the huge pressures of stars, expected to be produced in laboratories here on Earth? And how will it fit into the future of power generation?

Attendees will be exposed to the past, present and future of nuclear power production as well as being given the opportunity to network with other nuclear professionals in the industry over a dinner.

Wednesday 7th – Friday 9th September 2016

Confirm your attendance soon for an Early-Bird discount

To register interest please email – ygn@edf-energy.com

Hosted at the EDF Energy conference centre in Barnwood, Gloucester, with visits to the JET fusion reactor and Hinkley Point B Power Station.

Non NI members welcome

Kindly sponsored by EDF Energy.

EDF Energy plc. Registered in England and Wales. Registered No. 2366852.
Registered office: 40 Grosvenor Place, Victoria, London SW1X 7EN
