

Launch Event & General Members' Meeting #1

A technical working group of the Nuclear Engineering Directors' Forum (NEDF), hosted under the Nuclear Institute.

About the NCSWG

The Nuclear Civil Structures Working Group (NCSWG) brings together leading civil and structural engineering professionals from across the UK nuclear sector. It provides a dedicated technical forum to share experience, harmonise practices, and develop guidance supporting safety, quality, and efficiency across the full lifecycle of nuclear facilities.

Key Objectives

- Technical collaboration across the UK nuclear industry
- Professional development and CPD
- Technical publications and guidance
- Design code culture (RCC-CW, Eurocodes, US standards)
- UK visibility and conference participation

Call for Members

Designers, constructors, operators, regulators, academic institutions and industry bodies. Engineers at all career stages are welcome.
