

Mark Salisbury, FNucl Nuclear Innovation and Research Office (NIRO)

Mark is currently an advisor to Government with the Nuclear Innovation and Research Office. He graduated with a degree in chemistry from the University of Warwick in 2002 and is a Fellow of the World Nuclear University, Royal Society of Chemistry and Institute of Innovation and Knowledge Exchange. He is a Chartered Chemist and Scientist and sits on the Board of Trustees of the Nuclear Institute, of which he is also a Fellow.

Prior to his current role, Mark worked for Horizon Nuclear Power in numerous positions, latterly as the Operations Development Manager; responsible for developing plans for the operational utility intending to operate Horizon's plants. This included Horizon's Technical Apprentice Programme and Training Support Partner.

Whilst at Horizon he was one of 7 people to successfully complete the initial operator training on the Japanese Advanced Boiling Water Reactor in Japan through consecutive translation!

Prior to this, Mark has worked for British Energy at Sizewell B and for Powergen on nuclear, coal and gas fuelled power stations in Chemistry and Operations.
