

Introduction to Project Management

Date: Wednesday 11 July 2018

Location: Atkins, Birchwood Park, Warrington

Booking Deadline: 2 July 2018

This brand new event will give delegates an overview of the key principles of project management within the nuclear industry.

In addition to covering fundamentals such as risk management, resourcing and change control, industry experts from Sellafield, Atkins and REACT-Engineering will present case studies to provide nuclear specific examples of how project management is implemented.

There will also be a Q&A session with our panel of experts and a drinks reception following the event.
