

Implementing Digital Innovation in a Nuclear Environment

#GoDigital2020

Colin Ellam

Managing Director, Accenture Industry X.0

Colin's role in Accenture's Resources business unit concentrates on bringing digital innovation to clients operating in highly regulated industrial markets such as Oil & Gas, Mining, Chemicals, Utilities and of course, Nuclear.

His focus is across the full lifecycle of large and complex assets from design, through the build stage and into successful operations, not forgetting the life extension and decommissioning of these assets at the back end.
