

International Thermonuclear Experimental Reactor (ITER) Webinar North East Branch

ITER site construction progressing. Photo credit: ITER organization

The Event

The event will be held online and will include an update regarding construction of the ITER site, the fusion reactor, and its associated equipment. The webinar will also include a virtual tour presented by the ITER Organization, which will give a first-hand look into the design of the facility and reactor. The tour will be followed by a presentation by Assystem, one of the key companies contributing to the project as architect engineers and construction management-as-agents. They are also involved in various design activities, including specialist remote handling equipment. The Assystem presentation will focus on how they contribute to the world's largest fusion experiment!

Venue: Online – Zoom

Date: 7th October 2021

Time: 12:00pm (BST)

Registration: please register at:
