

22 NOVEMBER 2018, Evening networking event

Accenture , 30 Fenchurch Street, London

FREE to attend, booking essential

What is the role of DIGITAL in Defence and Civil nuclear?

An interactive seminar to explore applications of digital technology in the Nuclear industry

The growing use of digital in the Defence and Civil Nuclear industries is bringing new opportunities to firms and workforces operating in the sector.

Join us in an active discussion and discover more about the uses of digital technology in this rapidly changing industry.

- What are real-world applications of the latest digital technologies through Industry X.0?
- Which applications are making a difference on current projects?
- How will digital change the skills needed moving forward?
- How do we adapt our learning?

Get involved and connect with a growing community of industry professionals.
