

What is the role of **DIGITAL** in Defence & Civil nuclear?

Helen Barrow

Helen leads Accenture's Nuclear, Generation & Infrastructure practice in the UK. She has worked in the nuclear industry for 15 years, starting her career at the UKAEA and NDA, latterly leading consulting programmes for major infrastructure projects; supporting clients from investment case development to operational process excellence.

Helen is focussed on helping clients to improve the productivity of construction and power generation assets through innovation driven change.

Adrian Spragg

Adrian leads Accenture's Aerospace & Defence practice in the UK and is the firm's global Maritime leader. He brings over twenty years of experience, including ten years in industry and government – experience which has included leading the design of a nuclear submarine, managing maintenance programmes for the Royal Navy and delivering a major international defence programme.

Adrian specialises in defence sector strategy and capital programme delivery, having advised clients on multiple UK and international defence programmes over the last 10 years.
